EXOCAD RELEASES *CHAIRSIDECAD 3.0 GALWAY* SOFTWARE FOR SINGLE-VISIT DENTISTRY IN NORTH AMERICA

Fast and intuitive crown design software integrates with open hardware

WOBURN, USA/ DARMSTADT, Germany – November 28, 2021 -- exocad, an Align Technology, Inc. company and a leading dental CAD/CAM software provider, today announced the availability of *ChairsideCAD 3.0 Galway* in the United States and Canada.

The next-generation CAD software for single-visit dentistry will be showcased by exocad at the 2021 Greater New York Dental Meeting in New York City, held between November 28 and December 1.

This new release will provide dentists with design tools for a vast range of indications along with a wide choice of integrated devices. The chairside workflow is highly automated, intuitive and optimized for practice use. Newer users of CAD/CAM can benefit from fast wizard-guided workflows, while expert users can select free design sequences that offer greater flexibility.

The software includes a step-by-step guide through the design process and a smooth integration with open intraoral scanners, production devices and implant systems. *ChairsideCAD 3.0 Galway* also enables the in-house design of FDA-cleared custom abutments. "This software was designed to help clinicians who are adopting a single-visit dentistry model," said Larry Bodony, president, exocad America, Inc. "With *ChairsideCAD 3.0 Galway*, dentists can streamline their workflow – from the first restorative steps to the manufacture of the surgical components needed to complete a treatment plan."

The new release offers improved automatic design proposals. Instant Anatomic Morphing enables efficient adjustments: the anatomy of teeth automatically adjusts in real-time for dynamic occlusion. Smile design with exocad's advanced 2D/3D approach is now faster, thanks to AI-based detection of facial features. exocad's cloud-based data transfer tool, *dentalshare,* simplifies the communication and collaboration between clinicians, dental technicians and production centers. *ChairsideCAD 3.0 Galway* seamlessly integrates with exocad's leading lab and guided surgery software programs, *DentalCAD* and *exoplan*.

Users of the new *ChairsideCAD 3.0 Galway* can benefit from an in-office system that integrates with their current workflows. Further highlights include:

- Highly automated pre-op workflow: dentists can easily recreate the existing tooth anatomy if they choose to maintain the exact same shape and function of the tooth

- In-house design of custom abutments and screw-retained restorations (FDA-cleared)

- Expanded options for seamless integrations of intraoral scanners, 3D printers and milling machines

- Bi-directional communication with exocad's guided surgery solution exoplan*

- Simple interdisciplinary collaboration between practitioners and dental laboratories through efficient integration with *DentalCAD*, exocad's leading lab software

In 2021, for the third year in a row, the Cellerant Group, an independent group of technology-minded clinicians, selected *ChairsideCAD* as their 2021 Cellerant Best of Class Technology Award winner for clinical design software.
ChairsideCAD 3.0 Galway is now available in North America, EU and other select markets. exocad names its releases after current EU "European Capitals of Culture" and selected the Irish city of Galway for the current release cycle.
