

exocad

Booth 6363 and 742 (Cellerant BoC Alley)

ADA Guide

“A great chairside workflow is not always about same day work. For me, it's about integrating the technology I have to create a better patient experience. exocad *ChairsideCAD* uses an open approach to make all my scanners, mills, printers, and cameras work together. Patients love seeing everything work right in front of them, and the technology makes my work easier.”

Dr. Christopher M Silvoy, DMD and owner of Better Dentistry

"Your freedom is our passion" – clearly sums up exocad, and our company's philosophy. exocad delivers a unique open platform solution that makes it easy to integrate third-party products and services, a future-proof platform. The perfectly integrated and easy-to-use software solutions are characterized by maximum flexibility, robustness and design freedom which are distributed via strong partner companies to digital technology users in clinical practices and laboratories.

In this guide, we'll give you an overview of our products, highlight our speakers corner events as well as the different types of open-architecture partners you can visit at ADA to learn about exocad. For further information, talk to our team of experts at booth 6363 and 742 (Cellerant BoC Alley) or contact one of our system resellers.
