EXOCAD INTRODUCES *PARTIALCAD 3.2 ELEFSINA* FOR MORE DESIGN FLEXIBILITY FOR PARTIAL DENTURES

New software release enables the streamlined design of screw-retained hybrid dentures and clasps with a single click

DARMSTADT, Germany – May 23, 2024 – exocad, an Align Technology, Inc. company and a leading dental CAD/CAM software provider, today announced the release of *PartialCAD 3.2 Elefsina* for the design of high-quality removable partial dentures. *PartialCAD 3.2 Elefsina* introduces QuickSnap, a new workflow to design the first complete digital partial dentures, to all users. Additionally, the new release enables the streamlined design of screw-retained hybrid dentures, as well as the design of clasps with a single click, to save valuable design time.

“*PartialCAD 3.2 Elefsina* is the latest evolution of software development in removable partial dentures. We aim to provide designers freedom and flexibility when tackling the challenging work of partial denture design,” said exocad CEO Tillmann Steinbrecher.

Former beta feature QuickSnap for more production efficiency now available to all users

“Labs can now 3D print the framework, gingiva, and teeth in parallel, increasing production efficiency,” said exocad CEO Tillmann Steinbrecher. “The printed parts can be assembled in a few minutes with a light-cure assembly process, saving valuable time.”

PartialCAD 3.2 Elefsina is now available in all markets where exocad software is sold.

Press Release

PartialCAD 3.2 Elefsina is an essential part of the Align Digital Platform™, Align's integrated suite of unique, proprietary technologies and services delivered as a seamless, end-to-end solution for patients and consumers, orthodontists and GP dentists, and lab/partners.

exocad names its releases after current EU "European Capitals of Culture" and selected the city of Elefsina for this year's release.
